Apply data science and AI to improve education outcomes

Are you an emerging data scientist looking to apply AI, machine learning and advanced analytics to real-world challenges? Join ACER and help develop innovative data products and solutions that support education systems globally.

About ACER

The Australian Council for Educational Research (ACER) is an independent, international not-for-profit organisation focused on improving learning through world-class research, assessment and digital innovation. With approximately 400 staff across Australia and internationally, ACER delivers high-impact educational solutions at scale.

The **Measurement, Analytics and Technologies (MAT)** division drives innovation in assessment science and data-driven solutions, with a strong focus on advancing analytics capability, modernising data infrastructure and embedding AI across the organisation.

The Opportunity

We are seeking a **Data Scientist** to join the **Data Science and Automation Program (Statistical Software and Analytics team)**.

In this role, you will contribute to the development of AI-enabled data science solutions, from proof-of-concept through to operational delivery. You will work alongside senior team members to develop analytical tools, machine learning models and data products that support ACER's assessment, reporting and research activities.

Key Responsibilities

- Develop and deliver tested, version-controlled software and data products
- Apply AI, machine learning and NLP techniques to solve analytical and statistical problems
- Support the transition of proof-of-concept solutions into production environments
- Work with structured and unstructured data using SQL, Python and/or R
- Develop analytical outputs and data products to support Power BI and reporting solutions
- Contribute to the testing, validation and monitoring of data science models and workflows
- Apply responsible AI principles including privacy, fairness, explainability and reproducibility

- Collaborate with internal stakeholders and IT teams to deliver scalable cloud-based solutions
- Contribute to technical documentation and ongoing product maintenance
- Support continuous improvement and innovation across the organisation

What You'll Bring

- 3+ years' experience in data science, AI, advanced analytics or a related field
- Strong programming skills in Python and/or R
- Experience applying machine learning, NLP or AI techniques in operational settings
- Experience working with SQL and complex datasets
- Understanding of cloud platforms such as AWS or Azure
- Familiarity with Agile delivery practices and tools such as Jira and Confluence
- Strong analytical, problem-solving and communication skills
- Ability to work collaboratively with technical and non-technical stakeholders
- Postgraduate qualification (Master's degree or PhD) in a relevant discipline

This Role is Well Suited to Someone Who:

- Enjoys solving complex analytical and statistical problems
- Is interested in applying AI and data science to meaningful, real-world challenges
- Thrives in a collaborative and innovative environment
- Wants to continue building their technical capability and expertise
- Is passionate about the responsible use of AI and data

Why Work With Us

- Contribute to innovative AI and data science solutions with global education impact
- Work in a research-driven, collaborative environment

- Strong focus on learning, development and career growth
- Hybrid and flexible working arrangements
- Inclusive, values-driven organisational culture
